• P R E F A C E . •

IN presenting this New Catalogue to the Trade, it gives me pleasure to call their attention to the many New Locks which I have added to my well-known line of Pad Locks and Night Latches, which for beauty of finish, strength and security, are unexcelled.

I call *special* attention to my new line of Patent Bronze Metal Spring Pad Locks, Patent Tubular Night Latches, Store Door Dead Locks and Mortise Night Latches, which are self-adjusting to right or left hand doors, from $\frac{7}{8}$ to 3 inches thick ; also, to my new line of self-locking Drawer, Cupboard and Chest Locks, both Combination and Flat Steel Key with or without the patent catch, made of the best Bronze Metal, and finely finished.

Having enlarged my premises this year, I am prepared to fill any orders with the greatest despatch.

Thanking my customers for their former patronage, it will be my constant effort to merit a continuance of same.

WILSON BOHANNAN.

BROOKLYN, July 1st, 1886.

SAFETY LOCK

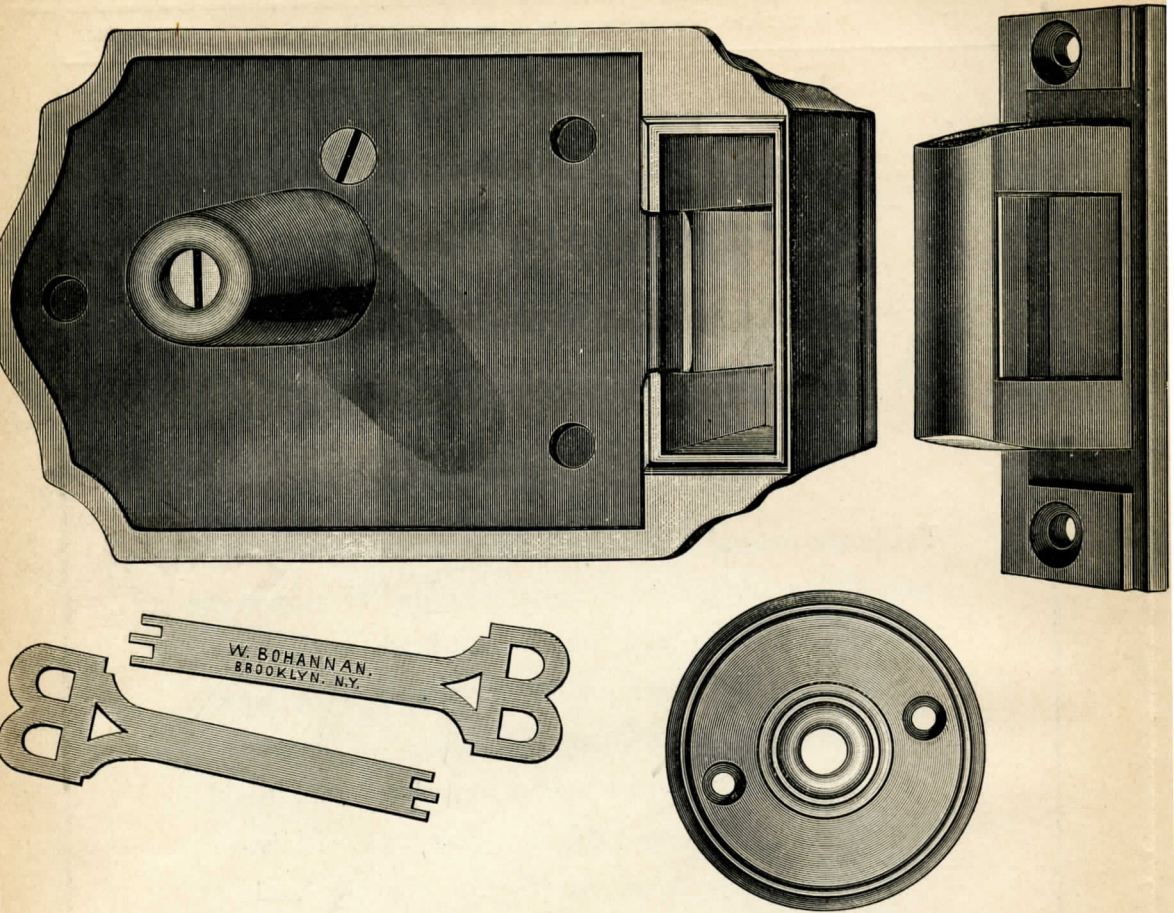

The construction of this Lock forms a complete prevention of cutting away the astragal or jam of a door, and pushing the latch back with a pen-knife or other instrument. The catch enters an opening in the case of the Lock with a corrugated flange which closes up the opening and prevents any instrument being inserted to push the latch bolt back. It also locks double doors together, or the jam and door together, thus preventing the knosen or catch being pried apart so as to liberate the latch bolt from the knosen or catch.
